

## Quiz on RSVP-TE

5 Marks total

Name: \_\_\_\_\_

1. [3 marks; 1 mark per pair] Name the TE constraints that can be used for defining an LSP path in RSVP.

- Follow the IGP (totally loose)
- TE metrics
- bandwidth reservation
- loose or strict hops
- hop-limit
- admin groups (aka link colouring)
- Shared Risk Link Groups (SRLG)

2. [2 marks; 1 mark per pair] Name the four optimizations for RSVP session refresh.

- Hello message
- Refresh randomization
- Msg ID + ACK
- Summary Refresh messages
