

Update on Classes

Hopefully you've received several emails with updates via BrightSpace since Fri Mar 13.

In summary, we're moving all activity and interactions online effective immediately. We'll continue to use Nokia lab equipment exactly as we've been doing all along for labs and postlabs – remotely via the Aventail VPN. Lectures will be hosted on either Zoom (<http://zoom.us>) or Jitsi Meet (<https://jitsi.org>). I'll be emailing out the meeting info ahead of time.

So ... if you haven't been getting the emails sent the last couple of days, please **immediately** email me directly because you'll need to get this sorted out. One common cause of problems is email filters which block emails where you're only on the bcc list (BrightSpace sends all emails to students this way).

Please pass on the word to your friends and classmates – you don't want to leave them out in the cold!
