

PostLab 8: ACL Practice

(Mostly)

The path to conquering ACLs is lots of practice. For this week's postlab, there's no work required on the equipment. In its place there's a main exercise on writing ACLs in Cisco's "standard" format.

That is followed by a second short quiz on ACL material from the slide deck and coverage provided during the lecture.

The postlab is intended to be shorter this week to account for the extra time & effort that went into studying for the midterm.
